

Functionality for Permits & Inspections

Improve Efficiency by Automating

- ✓ Enter application data for building permits
- ✓ Have multiples names, addresses and phone numbers per application
- ✓ Create multiple sub-contractors associated with a single permit
- ✓ Distinguish between building permits and sub-permits
- ✓ Search for permits, parcels or applicants using a number of variables
- ✓ Attach documents and images to permits, parcels, contacts and accounts
- ✓ Automate fee calculation and permit expiration dates
- ✓ Provide permit histories by parcel
- ✓ Access built-in mapping system
- ✓ Duplicate a permit for a new application at a different location
- ✓ Update permit status through to final once all inspections are complete
- ✓ Automatically check contractor requirements before a permit is processed

Provide Better Service by Managing Work Flow

- ✓ Define an appropriate inspection order for work flow
- ✓ Track the status of permit applications through to approval
- ✓ Schedule work flow and send email notifications to staff
- ✓ Schedule, automatically assign and track inspections
- ✓ Limit the number of inspections per inspector or reassign inspections
- ✓ Disallow final inspection approval until predevelopment conditions met
- ✓ Automate alerts for overdue inspections and re-inspections
- ✓ Login to the software from work, home or in the field
- ✓ Allow multiple users to access the software simultaneously

Access Data Quickly with Reports & Dashboards

- ✓ Generate custom reports with the report wizard
- ✓ Use several pre-built reports on permitting and inspections
- ✓ Use graphical dashboards to display key information
- ✓ Drill down on reports for further detail
- ✓ Export all reports to Excel or CSV file formats

Customize & Configure to Your Needs

- ✓ Import historical data from other systems
- ✓ Define and maintain codes using a pick list
- ✓ Create an inspection checklist that can be updated
- ✓ Upload email and letter templates
- ✓ Upload data tables for automated fee and value calculations
- ✓ Customize the software to business rules, work flow and terminology
- ✓ Integrate with your GIS system
- ✓ Restrict access by defining roles or read only access

Benefit from Free Data Security, Upgrades & Support

- ✓ Receive data backups automatically
- ✓ Receive software upgrades automatically when you login
- ✓ Benefit from a SAS 70 Type II certification
- ✓ Access online help documentation and resources
- ✓ Receive training for how to use the application
- ✓ Access ongoing technical support
