

Introduction

Developed and maintained by Municipal Software, Local Government Manager benefits from 25 years of experience with municipal government.

What is Local Government Manager?

Local Government Manager helps municipalities automate their critical business processes quickly and easily.

Local Government Manager will:

- Automate your work flow
- Reduce staff time in tracking projects
- Improve customer service and turnaround time
- Enhance communication with internal and external stakeholders
- Improve data accuracy and access to information

Who is it for?

Local Government Manager is a web-based solution for municipalities that cannot afford the cost or complexity of on-premise solutions. Local Government Manager is good for municipalities that:

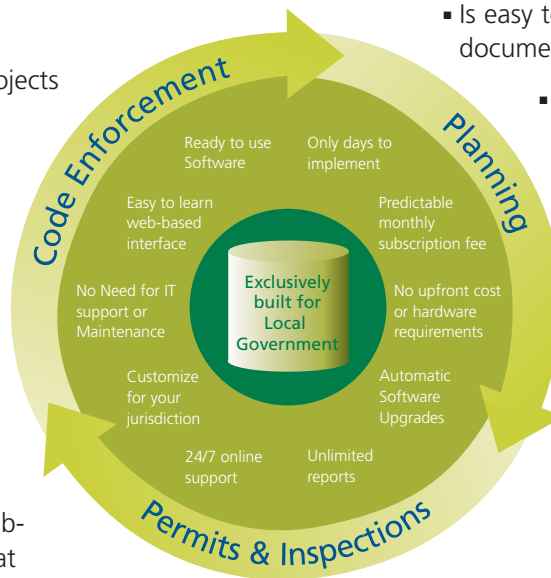

- Are looking for an application that is quick to implement
- Are looking for cost effective software, with no upfront cost
- Require a ready-to-use system that is easy to learn
- Want to remove the need to maintain backups and software upgrades
- Have limited IT resources and/or budget
- Require a proven application that can easily grow with their needs

Why use Local Government Manager?

Local Government Manager helps municipalities save time and money while improving service and communication.

Local Government Manager:

- Is easy to use and includes online help documentation
- Provides a central location for everything you need to know
- Generates consistent reports every time, including custom reports
- Provides access to your data 24/7 from the office, home or in the field
- Can be configured and customized to your unique needs
- Provides a quick return on investment as you can be up and running within weeks

What does Local Government Manager Automate?

Local Government Manager is an integrated solution for:

- **Permits & Inspections** – manage all critical permitting and inspection functions from application to approval including managing the inspection order, work flow and status.
- **Code Enforcement** – manage and track all code enforcement cases from complaint to resolution including flagging parcels with code violations, generating compliance dates, automating notifications and preparing documents for boards.
- **Planning** – manage and track planning applications and project milestones including flagging projects and preventing changes in status by unauthorized individuals.
